

## **Editorial**

This is the premiere issue of the IADIS International Journal on Computer Science and Information Systems (ISSN: 1646-3692).

The IADIS International Journal on Computer Science and Information Systems (IJCSIS) will be devoted to Computer Science and Information Systems. More specifically, it will focus on all aspects of Applied Computer Science and Information Systems. The IADIS IJCSIS is a peer-reviewed scientific journal published exclusively in an electronic form. Its mission is to publish original contributions in order to disseminate knowledge amongst its readers and to be a reference publication.

IADIS IJCSIS will publish original research papers and review papers, as well as auxiliary material such as: short ongoing research papers, case studies, conference reports, management reports, book reviews and commentaries.

This first issue consists of extended versions of papers selected from the IADIS International Conference Applied Computing 2005, hosted in Algarve, Portugal, 22-25 February 2005 and from the IADIS Virtual Multi Conference on Computer Science and Information Systems (MCCSIS 2005), that took place 11-29 April 2005. The nine papers published here have been considered outstanding by the reviewers' comments and ratings, which lead to an invitation to prepare their extended versions.

In addition to best papers from selected conferences and regularly submitted papers, Special Issues devoted to themes will also be considered.

The Editors,  
Pedro Isaías  
Marcin Paprzycki
